SUMMARY

I'm a full-stack software developer, fluent in both English and French with eight plus years of professional experience, driven by delivering tangible results. My passion lies in developing efficient and innovative solutions that address complex challenges. I am currently seeking a challenging role where I can leverage my technical expertise and collaborate effectively with a cross-functional team.

SKILLS

- **Operating systems:** Linux, Windows, and macOS
- **Programming languages:** Back-end Development (Python - [Django, FastAPI], PHP, goLang, C#, Laravel, Codeigniter, Drupal, WordPress, NodeJS, NextJS), Frontend development (HTML5, CSS3, JavaScript/TypeScript, jQuery, Bootstrap/Tailwind CSS, React.js, Vue.js, Angular including Server Side Rendering), Database technologies - rdbms (Postgres, DB2, MySQL, SQL server), NoSQL databases (Firebase, MongoDB, Cassandra, Redis), Bash
- I am a creative problem solver with excellent attention to detail, teamwork, challenge assumptions and troubleshoot, fostering collaboration and inclusivity. I am adaptable to changing project requirements and technologies, with interpersonal and communication skills. I have leadership skills, multitasking ability, and a strong sense of coordination using Agile methodologies and software design patterns to ensure scalability.

PROFESSIONAL EXPERIENCE

Full stack developer - Allo Prof,

Sep 2024 - Present

- Worked on an educational platform that provides assistance to students across Quebec and Canada using Typescript, Angular, NodeJS with a Drupal CMS.
- I led the integration of an interactive vocabulary exercise game developed in ReactJS with the Angular Standalone library using polyfills. Also migrated the functionality managing the words for the game to the Squidex CMS platform for better performance.
- Implemented key features such as the Multi Level Sheets (MLS) and Group accounts for classroom teachers which led to an increase in engagement from students and teachers alike of 70%
- Peered reviewed codes on GitHub and managed deployments to the staging environment.
- Created test cases for all my tickets and performed End-to-End QA testing to ensure proper functionality

Technical Environment: JIRA, Scrum/Kanban, Git, Drupal, Docker, GCP, Cloudbuild, Terraform, Figma, Google Analytics, Docker/Kubernetes, Firebase, Composer, NginX, SSR

Full stack developer - Blue Window LTD,

Dec 2022 - June 2024

- Developed SEO/Marketing platforms for iGaming labels across Europe and North America using JavaScript/Typescript, NodeJS, and Angular
- I led the RBO team, managing a PBN developed in PHP, JavaScript, and CSS for content creation, management, and deployment across 8000+ websites.
- Implemented CI/CD pipelines using Cloud Build to automate code deployment from GitHub to GCP server. Configured JIRA pipeline for direct viewing of PRs from GitHub.
- Led the landing page project, utilizing Hugo and Wrangler to create 5000+ pages for traffic redirection. Deployed on Cloudflare's serverless architecture, resulting in a 30% increase in traffic towards affiliate brands within one month.
- Developed widgets for Athena, a React project that configures HTML components as Cloudflare workers. Enabled seamless integration of CTA elements across 3000+ websites.
- Optimized code and improved Core Web Vitals (CWV) metrics from below 40% to above 98% on multiple pages and sites. Enhanced User interfaces/User experience for better SEO ranking.
- Configured docker container instances for our web applications.

- Led Toolkit project, writing Python scripts to configure features on 5000+ sites on Cloudflare using the Cloudflare API. Wrote Python scripts to move files between hosts and client ftp/ftps. Developed Python scripts to crawl 3000+ websites, disabling Google indexation for external links.
 - Managed code reviews and approvals for developers. Held weekly catch-up meetings to discuss performance.
- Technical Environment:** JIRA, Scrum/Kanban, Git, Cloudflare, Docker, GCP, Cloudbuild, Terraform, Figma, Google Analytics, Docker/Kubernetes, Firebase, Composer, WAMP, XDebug

Frontend developer - Data Tellers Inc.

Jun 2022 - Nov 2022

- Developed a Typescript-based logistics management platform using the React JavaScript frameworks and Ant Design. Enabled electronic management of client operations and contracts for companies.
- Used Figma to create high-quality mock-ups for a consistent style guide and responsive design across all pages. Collaborated with product owners to ensure business needs were met during product development.
- Designed and implemented a system wide notification and time usage microservices that enable users to send notifications while maintaining the current state.

Technical Environment: GraphiQL, JIRA, Scrum, Git, AWS, Cloudrun, Jest, Figma, Express.js, webpack

Lead Software Developer - Smart Systems Corp,

Nov 2018 - May 2022

- Led a web development team of five developers, overseeing SCRUM meetings, user story creation, mockups, code reviews on GitHub, and language/tool selection.
- Efficiently migrated the database infrastructure from MySQL to PostgreSQL, optimizing procedures and functions, resulting in a 75% increase in database query speed.
- Re-designed the backend from PHP to NodeJS and increased server requests speed by 35%.
- Created a NodeJS and Express API to connect the front-end (mobile and desktop) with the database, enabling seamless data exchange and interaction.
- Designed and developed reusable React components for the front-end team, significantly improving the efficiency and consistency of the development process. This effort resulted in an 80% increase in dev speed.
- Conducted Quality Assurance and Test-Driven development by writing manual and automated test cases using Jest. This rigorous validation process ensured the reliability and accuracy of the Smart School System.
- Exhibited exceptional team leadership through conducting weekly catch-up and performance review meetings, allowing for effective ticket assignment and workflow updates.

Technical Environment: JIRA, Slack, GIT, Jest, GraphiQL, Scrum, Express.js, GCP, Cloudbuild, Docker

Junior Software Developer - Pether Solutions Corp,

Jul 2016 - Aug 2018

- Built an Insurance Health Claim Application utilizing JavaScript, PHP, CSS, and Java/JaVaFX. This application dramatically reduced insurance claim waiting time from over 7 days to just 2 days, leading to improved efficiency and customer satisfaction.
- Responsible for documentation using Confluence to ensure seamless installations and device compatibility.
- Tested software and performed manual Quality Assurance and Unit Testing to ascertain software quality.

Technical Environment: JIRA, Slack, GIT, Confluence, Jasper, JSON, Jenkins, Composer, WAMP, XDebug

EDUCATION

Attestation of Collegiate Studies in Cyber Security

2025

Montreal College of Information Technology (MCIT), Quebec, Canada

Master Degree in Computer Science

2021

University of Buea, Cameroon

Accessed as equivalent to a Master's Degree from a Canadian University by WES and MIFI of Quebec

Bachelor Degree in Computer Science

2016

University of Buea, Cameroon
